Have removed their Merchant Tailoring Establishment from Cooper's building to C. H. White's new store, No. 31, Second street, where they will be pleased to have the public call on them. Prices low and work the best. **WINDHORST & BLUM.**

Kendall's Spavin Cure.

The Most Successful Remedy ever discovered, as it is certain its effects and does not blister. READ PROOF BELOW.

From Rev. P. N. GRANGER,

Presiding Elder of the St. Albans District, ST. ALBANS, VT., Jan., 20, 1880.

DR. B. J. KENDALL & Co., Gents:—In reply to your letter I will say that my experience with 'Kendall's Spavin Cure' has been very satisfactory indeed. Three or four years ago I procured a bottle of your agent, and with it, cured a horse of lameness caused by a spavin. Last season my horse became very lame and I turned him out for a few weeks when he became better, but when I put him on the road he grew worse, when I discovered that a ringbone was forming, I procured a bottle of Kendall's Spavin Cure and with less than a bottle cured him so that he is not lame, neither can the bunch be found. Respectfully yours, P. N. GRANGER.

Perseverance Will Tell.

STROUGHTON, MASS., March 16, 1880.

B. J. KENDALL & Co., Gents:—In justice to you and myself, I think I ought to let you know that I have removed two bone spavins with 'Kendall's Spavin Cure,' one very large one, don't know how long the spavin had been there. I have owned the horse eight months. It took me four months to take the large one off and two for the small one. I have used ten bottles. The horse is entirely well, not at all stiff, and no bunch to be seen or felt. This is a wonderful medicine. It is a new thing here, but if it does for all what it has done for me it will be very great. Respectfully yours, CHAS. E. PARKER.

KENDALL'S SPAVIN CURE is sure in its effects, mild in its action as it does not blister, yet it is penetrating and powerful to reach a every deep seated pain or to remove any bony growth or other enlargement, such as spavins, splints, curbs, callous, sprains, swellings, any lameness and all enlargements of the joints or limbs, or rheumatism in man and for any purpose for which a liniment is used for man or beast. It is now known to be the best liniment for man ever used, acting mild and yet certain in its effects.

Send address for illustrated Circular which we think gives positive proof of its virtues. No remedy has ever met with such unqualified success to our knowledge, for beast as well as man.

Price \$1. per bottle, or six bottles for \$5. ALL DRUGGERS have it or can get it for you or it will be sent to any address on receipt of price by the proprietors, DR. B. J. KENDALL & CO. Enosburgh Falls, Vermont. 127d.

AN ITALIAN EVANGELINE.

The Remarkable Romance that a Mohawk Reporter Relates.

Amsterdam Recorder.

A gang of Italian laborers have for months past been employed on the West Shore Railroad a few miles below Amsterdam. They are very quiet industrious, and well behaved, and seem to be above the average of Italian laborers. Among them was one whose form was slender and symmetrical, complexion fair with a slight olive tint, eyes dark and lustrous, and hair long, dark hued, and wavy. An Evening Recorder reporter who visited the spot a couple of days ago gleaned from persons well acquainted with facts the following romantic story:

The fair personage was a woman. Her name was Angella Lourino. He lover, Franko Patricio, came to America, like many of his countrymen, to better his fortune. The fair Angella pined in his absence, and finally determined to join him in the far-off America. To carry out her plan she disguised herself in men's attire, and having no money with which to pay passage, she stowed herself away upon an ocean steamer bound for the United States. After the steamer sailed she was discovered and willingly did a sailor's hard duty to work her passage across the broad Atlantic.

At length she arrived in New York city, only to learn, after patient investigation, that her lover had joined the army of Italian laborers upon the West Shore Railroad. Nothing daunted, she, too, became a railroad worker, and labored for her daily bread at at various points along the West Shore Railroad, ever keeping the object of her life—to find her long-lost lover—in view.

During her wanderings she came near meeting him. Once she caught sight of his form on the deck of the canal boat which passed near the spot where she was at work, but the overseer kept her at her task, and the boat went onward. At another time she caught a glimpse of him as he was rapidly whirled by the Amsterdam railroad station on an express train. In the course of her wanderings and changes she was finally located with a gang of Italian laborers a few miles below this village. Her constitution, naturally delicate was unable to endure the exposure and hard work, and she fell a victim to typhoid fever. The fatal disease made rapid work, and the poor girl, who, until her sickness, had strictly kept to herself the secret of her sex, rapidly succumbed to its ravages. As the end approached, Angella awoke to consciousness from her feverish delirium and saw her lover. He had been detailed to work at this spot and arrived only in time to see her die. She fixed her eyes on the face of her lover with a look of love, and faintly murmured, in the language of her native land: "At last we meet, only to part forever. Farewell, my dearest." With these words she died.

The remains of Angella were laid upon a platform, covered with a cloth, and stones placed beneath her head. For four days and nights the body was kept in this position, while the lover kept a ceaseless vigil beside it. At the expiration of this time the body was wrapped in a winding sheet and buried in the "dump" of the road bed the remains being covered with earth from the dumping carts.

The smallest baby was born in Chandalaria, Nevada, a few weeks ago. The father and mother are strong and healthy, weighing 190 and 160 pounds. The child is male, perfectly formed. When it first saw light it weighed eight ounces. Its face is about the size of a horse chestnut. The mother's wedding ring was pulled over its foot up to the knee. Three such babies could play hide and seek in a cigar box. It is in good health.

Sullivan, the pugilist, failed to put in an appearance at the meeting in New York Monday night, at which his match with Tom Allen was to have been arranged.

CELESTINE'S CURIOUS REVENGE.

A Sort of Creole Cross Between Hamlet's Uncle and Xautippe.

New Orleans Picayune.

Romance, like history, repeats itself; and the performance given by the melancholy Dane for the benefit of his mother and uncle found a new rendering last Sunday at a house on Frenchman, between Morales and Goodchildren streets. Jordan Joseph, an elderly quadroon, has been married twenty years to Celestine Ricard. For some reason they quareled at the breakfast table on Saturday. About 10 o'clock in the forenoon Joseph walked into the kitchen and observed a kettle of water on the stove, boiling hot. Although it was an unusual hour, the dishes being all washed and put away, he did not ask what she was about, but, feeling sleepy, laid himself down on the gallery for a siesta. He placed his hat over his face to protect it from the flies and his eyes from the light, and was soon snoring quite comfortably, his left ear uppermost.

Celestine was waiting for this opportunity, and as soon as she was satisfied that Joseph was sound asleep she stepped lightly into the kitchen and took the kettle of boiling water off the stove. On tiptoe she crept back to the gallery on which her husband was asleep, and holding the spout in such a position that the hot water would run into his ear, she tipped the kettle. Her hands were unsteady, and a few drops fell out of the spout and on Joseph's face. With a yell of anguish he awoke, and then Celestine elevated the kettle of scalding water falling on the neck and back of Joseph's head, scalding him terribly. He gained his feet and seized the woman, but she kept him from injuring her by pouring the water on his left leg and feet. The agony was more than Joseph could bear, and he released her and she escaped. Since then the couple have been dodging each other in various parts of the city.

Some Small Things.

The mule has the reputation of having the smallest and daintiest foot for its size of all hoofed animals.

Diamond is the smallest movable type in the world it often gets under the finger nails of compositors.

Watches made as early as 1700 were so delicately constructed by hand, and so small, as to easily fit on the top of a lead pencil.

Bismarck is easily offended. A Berlin butcher named one of his products "The Bismarck Sausage," and for so small a thing was arrested.

It is worthy of remark that a mosquito has concealed in his bill six complete surgical instruments, each so minute as to be indiscernible to the naked eye.

General Longer, the editor of a newspaper called the Key West Democrat, 20 years old, 40 inches high, and weighs 35 pounds. The General was born in San Domingo and raised in Florida.

The sting of a honey bee, when compared with the point of a fine needle under a powerful magnifying glass, is scarcely discernible. The point of the needle seemed to be about an inch in breadth.

Prof. Edward C. Pickering, of Harvard College, says that he is undertaking to measure the light of the satellite of Mars, a hole about the twenty-five hundredth part of an inch in diameter was required.

A very curious little toy is the microscope containing the Lord's prayer. The whole prayer is on a piece of glass not larger than the head of a pin, yet it is magnified to such an extent that it can be read easily by looking through the microscope.

The smallest hogs in the world are quartered in the Zoological Gardens in London. They came from Australia, and are known as the "pigmy hogs." They are about the size of a wild hare.
